power to lift.

5. Electrical Power (cable 1):

- i. Connect the brown and green wires to +10VDC to +30VDC.
- ii. Connect the white wire to Minus.

Morten Ballebye 99-03-2012 Side 5 af 14

6. Start up the system and controlling the crane by remote control:

- i. Release the red emergency stop button on the remote control.
- ii. Push the black start button once and wait until the remote control is turned on.
- iii. Push the green button once.

U:\RCCX\Agder_Universitet\Brugervejledning\Installation_and_user_quick_guide.doc

iv. It is now possible to control the crane via the remote control levers, see page 12.

Morten Ballebye 09-03-2012 Side 6 af 14

7. Remote control – Info Center (i) Start up screen:

i. Time to service

ii. Crane load

 Side 7 af 14

8. Remote control – Info Center (ii) After start up:

i. Screen 1

ii. Battery level

iii. Crane load

Morten Ballebye U:\RCCX\Agder_Universitet\Brugervejledning\Installation_and_user_quick_guide.doc Side 8 af 14

9. Remote control – Info Center (iii) Changing the displayed icons in the remote control Info Center:

- i. Activate switch 10, ie. move it to the right position.
- ii. Push the yellow button.

U:\RCCX\Agder_Universitet\Brugervejledning\Installation_and_user_quick_guide.doc

iii. The information in the Info Center is now changed for each click on the yellow button.

forten Ballebye 09-03-2012 Side 9 af 14

10. Remote control – Info Center (iv) Other information from the Info Center:

- i. Screen 2
- ii. The turtle & the text '100%' indicates that full speed is possible on the crane functions.
- iii. The hand icon in dicates whether a crane stop situation is being executed and the remaining stop time in seconds.

Morten Ballebye 99-03-2012 Side 10 af 14

11. Remote control – Info Center (v) Other information from the Info Center:

- i. Screen 2: The turtle indicates '0%', meaning that the crane is in low speed (ie. HDL Heavy Duty Lifting) mode. This mode is active if the 'FUNC' diode is blinking and:
 - a. the crane load exceeds 80% of the lifting capacity, or
 - b. the red button is pushed once

Morten Ballebye 99-03-2012 Side 11 af 14

12. Crane functions – hand paddles for remote control:

1. EX.VALVE (Fly Jib) **BOOM EXTENSION** 2. EX. VALVE (FJ extension) **SLEW** JIB 13 1578 3191 157B 3191

13. Start up the system and controlling the crane manually (directly on the crane control valve)

- i. Keep the transmitter turned off.
- ii. Push the green button on the RCL5300 front once. The RCL5300 display shows 180, ie. no radio contact.
- iii. Keep the yellow button pressed, while the red button is pressed once. The display must show 186, ie. manual operation mode is selected.
- iv. The crane can now be operated manually, see next page.
- v. **Before the crane can be operated by the remote control again:** Turn on the remote control. Keep the yellow button on the RCL5300 pressed, while the red button is pressed once. The RCL5300 display must show a running line and dot. The crane is now ready for remote control.
